

## PTT OPERATOR FOOT SWITCH

This foot switch has been designed to facilitate the work of air controllers who usually work in a sitting position.

## PEDP21051

### ERGONOMICS

- A width of more than 300mm allows to keep the pedal "under the foot" without having to fumble.
- A total depth of 180mm insures stability and comfort at the same time.
- A reduced height, a base plane dip (42mm in the front and 52mm in the rear) and a reduced run (5mm) insure a minimum of weariness during use
- The definite return force offers a good perception of the pedal's movement
- Shock absorbers on the limit stop allow for a silent operation
- Anti-skid hubs found under the tread prohibit all movement of the pedal during its use
- The pedal's upper portion is equipped with an anti-skid coating

### CONNECTION CABLE

- Length 2.50m
- Exit of the pedal from the rear on a packing gland
- DIN 7 Connector male pins with a screw ferrule
  - PTT: pins 7
  - ground: pins 3
  - protection is connected to the mobile plug's body

### DIMENSIONS

- Width: 335mm
- Overall depth: 190mm (support surface: 160mm)
- Front height of 42mm, Rear height of 52mm
- Weight: 1.870kg

### COMMUTATION

- Two micro-switches wired in parallel
- Alloy contacts out of Gold-Silver-Platinum (Au69, Ag25, Pt6)
- Life expectancy > 10 million maneuverings
